

## What is a Dermatologist?

If you're reading this you most likely already know what a dermatologist is. However, it can help you better understand your care and what a dermatologist can do for you. Dermatologists are medical doctors who complete a 4 year residency training in skin, hair and nail diseases. Dermatologists are also experts in skin cancer and surgery of the skin. No other area of medicine is as highly trained in the area of skin and skin cancer. The training required for a dermatologist involves advanced education in greater detail than any other area of medicine in the skin, skin diseases, skin cancer diagnosis and management as well as cosmetic dermatology.

Many patients seek dermatologic evaluations for routine skin cancer screening examinations as this is the highest trained specialty for this. In addition dermatologist are experts in other skin growths, skin cancer, rosacea, eczema, psoriasis, acne and warts so many people see dermatologist for these common skin problems.

Since skin cancer is the number one cancer diagnosed in America today (affecting up to 1 in 3 people), most people go to see a dermatologist annually for a skin cancer screening examination.

Dr. Roger Moore treats patients with basal cell carcinoma and squamous cell carcinoma from Elkhart, South Bend, Goshen and all of Michiana. The renowned removal technique of Mohs Micrographic surgery is performed routinely by Dr. Moore as well. He is the first to offer this technique in Elkhart County.

If you or someone you know has a skin concern or problem call Dr. Roger Moore and his team at DermacenterMD today at (574)522-0265. No referral is necessary and don't forget, no other area of medicine is as highly trained in the skin.
